## RESEARCH STRUCTURAL ALIGNMENT OF THE LIVING MECHANISM

Need is growing for treatment of addiction, psychosis as well as dire mental health illness and disorders not responding to chemical force.

- Toxic impact of violence in communities
- Source and natural medical application

## WHAT IS THE SOURCE?

10.5 million Imprisoned globally

- \*war and genocide
- \*drug related crime
- \*knife crime
- \*violence against maternal bond/women
- \*family constellation injuries and injustice
- \*feuds
- \*war crimes atrocities
- \*suicide
- \*Broken maternal bonds
- \*homicide
- \*violence against police soldiers prison staff healthcare workers

*Amundsen the artic explorer and adventurer packed but two shovels. We can make a start.*

‘One suicide within prison is too many’

## SOUND TREATMENT PERMEATING TIME

There are 10.5 million incarcerated globally for the protection of populations. Violence is faster than the speed of thought.

How do we reach the source of injury that has occurred in long forgotten time, if the injury is held at atomic cell level, as with a homicide? How can we reach through time to influence the structure holding a fault that governs the function of the mechanism? If we can reach the pain held in the past it must be possible to change the future.

## VIOLENCE IS FASTER THAN THE SPEED OF THOUGHT

We were given a court order for one youth lashing out in the community, it took the combined strength of 40 guards to manage his violence. Source? Father's homicide. How can we reach the source injury? We would require a transformative material to reach and influence time at an atomic level. Can we reach the fabric of time? His father was murdered when he was twelve years old. What has time to do with the law of similars? Can the here and now reach the pain of the past here and now and influence the future? If we reach the suffering of the past we interrupt the fault in manifestation in to the future and by what method do we access the life force?

## WORKING WITH NATURAL MEDICAL LAW - THE LIQUID FIRE OF THE RESTORATIVE FLUID OF THE MUSCLO SKELETAL SYSTEM

Access the cause and the effect will resolve. To reach the source you have to have the ability to reach back in time. The injury is held as an imprint at atomic cellular intelligence level echo. The finite speed of light introduces the potential. How do we reach through time to achieve law of similars reaction held in a matrix tidal flow of cerebral spinal fluid flow?

## SOUND TREATMENT OF VIOLENCE

With the aid of the heart the brain burnt the body. I want to touch in on the obstruction of tidal fluid flow rhythm and symmetry:

Violence is a toxic intrusion on the musclo skeletal structure,

an irritant entering the body by impact. A change appears in the heart from the effect in the brain, a change occurs in the family constellation following the impact of violence. The impact includes a dissonance echo like a continuous scream which escalates through time. Toxic intrusion impact causes obstruction of rhythm. We now have a sound fault you cannot hear which manifests imbalance in symmetry. We now have an invasive heat inflammation lesion pattern.

### **UK GOVERNMENT RESEARCH UNDERTAKEN BY KINGS COLLEGE HOSPITAL**

UK government research findings are this naturopathic treatment approach has improved structural stability in a high risk violent work environment 'prison', achieved recovery confidence in patients with histories of family constellation injuries, mental health diagnosis, imprisonment and institutionalization. The research and evaluation report was commissioned by the UK state prison service directorate.

### **SO WHAT DID WE DO?**

Adults and children are caught up in lashing out behavior with toxic solutions. We have reached marginalised cultures with mothers impacted by violence in the home, the workplace, in communities with high rates of trauma tragedy suicide and homicide. Impact of war has reached all cultures and communities.

There is a lack of understanding in the medical law of similars. I want to introduce to you a non-invasive approach in permeating engineering mechanism adjustment. Through what path can we reach the imprint of harm held in the musculo skeletal?

### **THE MOTION OF THE TIDAL FLUID FLOW AND ARTICULATION OF THE CRANIAL PLATES**

Structural alignment, this integrated detox approach focuses attention on the motion of the circulation of the fluid impacting pain reduction. The research assessment included medical naturopathy screening, family constellation assessment, clinical analysis, structural analysis, previous accident injuries and past violence impact.

We have been working with women and mothers in marginalised communities. Our target groups has included young offenders in broken criminal cultures. We are reach violent subjugated youths in gangs. We are reaching violent men in prisons who want to address their issues. War, atrocities, violence, and corruption is a non- ignorable fact coming home to roost. Violence is core to maternal bond severance.

### **WORKING WITH THE LAW OF NATURAL MEDICINE**

- Harsh detox to dissolve inflammation
- Impact of toxic irritant violence includes pain, discomfort, fatigue, headache, irritability and anxiety.
- Detox action includes injustice corruption dishonesty greed resources grab

A word on hard detox nutrition, sugar free, gluten free:

Cease alcohol, eat probiotics food, non-starchy vegetables. Alcohol and food can provide the conditions for chemical change from sugar to fermentation which impairs immunity and maintains inflammation.
